

NAME: **VISHNU KUMAR**

Designation: SRE/DevOps SERVICES

E-mail: vishnu.1.kumar@coforge.com

Mob. No: +91 9958630883

Experience: 09 years

Location: C-64, sec-51, Noida, India

PROFESSIONAL SUMMARY

- ☒ Overall, 09 years of IT experience specializing in AWS-DevOps/Azure-DevOps, (SRE), Linux Administration, Application and Production Support, Cloud Infrastructure, and AWS cloud. Good Experience in Terraform, Docker, Kubernetes, Ansible, and CI/CD implementation using GitLab pipelines
- ☒ **07** months of experience with Coforge.
- ☒ Experience with IT Infrastructure DevOps/production/application support, and management.
- ☒ Experience in **Travel domain, Banking, Healthcare, Fintech & Ecom** for Infra Management services.
- ☒ Experience in **Linux Server, Cloud Infrastructure, Amazon Web Services (AWS), Docker, Kubernetes, Ansible, CI/CD** Pipeline app logging and troubleshooting.
- ☒ Strong experience in **Linux, AWS** and **Terraform, Docker/Kubernetes CI-CD Pipeline** administration & Troubleshooting.
- ☒ Experience in **Agile** and **WATERFALL** Methodology.
- ☒ Experience with other tools like **ServiceNow** for incident management, **Confluences**, etc.

TECHNICAL SUMMARY

Technologies/ Framework	• Cloud Platforms: Deep understanding of IT Infrastructure on AWS, including provisioning and managing resources like EC2, S3, IAM using Terraform. • Operating Systems: Proficient in managing and administering Linux (Ubuntu) servers. • Infrastructure as Code (IaC): Hands-on experience with Terraform for cloud resource automation and Ansible for service configuration and management. • Container Orchestration: Skilled in deploying and managing microservices on Amazon EKS (Elastic Kubernetes Service). • API Management: Experience configuring Apache APISIX API Gateway, including upstream services and routing rules.
------------------------------------	--

	• Identity & Access Management: Successfully installed and implemented Keycloak for centralized authentication and authorization. • Security & Compliance: Strong background in patch management, vulnerability assessment, and security compliance, including secure path deployments. • CI/CD Pipeline: Designed and implemented robust CI/CD pipelines using GitLab, automating build, test, and deployment processes. • GitOps: Proficient in using Argo CD for continuous delivery and Kubernetes application lifecycle management. • Monitoring & Observability: Experience in application monitoring and logging for proactive issue resolution and performance optimization.
Domain/Industry	Travel (Airlines), Banking, FinTech, ECom & Insurance
Build Tool	Jenkins/GitLab: Integrated Jenkins with GitLab, Terraform, and Kubernetes to streamline DevOps workflows.
AWS-Clouds	Amazon Web Services (AWS) Cloud,
Web Servers	web server (Apache), nginx
Databases	MySQL, PSQL
Version Control	GitHub, GitLab
Operating Systems	Linux Ubuntu
Configuration Management	Ansible
Software Methodologies	Agile

Client Name : Fiserv Fintech		Duration : Feb 2025 to till Now
Team Size	4	
Technologies	Linux Servers Administration, AWS Cloud, Terraform, Docker/Kubernetes and CI/CD Pipeline, GitLab.	
Role	DevOps Engineer	
Project Overview	Financial institutions, banks and fintech's in India have been partnering with Fiserv to provide fast, secure and innovative payment technology. Fiserv Fintech Project, there is a stream DAP (Dap Analytics Platform) where we had migrated of some services.	

Roles & Responsibilities	1. Write Terraform scripts to provision AWS resources, such as EC2, S3 buckets, S3 policy and role management across multiple environments, ensuring consistent and scalable infrastructure deployment. 2. Identified and resolved two complex issues within GitLab Pipelines, enhancing the reliability and efficiency of the CI/CD process. 3. Initiated and implemented automation for server patching tasks in AWS using AWS Systems Manager, significantly streamlining maintenance operations and reducing manual intervention. 4. Strong background in patch management, vulnerability assessment, and security compliance, including secure path deployments. 5. Designed and implemented robust CI/CD pipelines using GitLab, automating build, test, and deployment processes. 6. Proficient in using Argo CD for GitOps-based continuous delivery and Kubernetes application management. 7. Experience in application monitoring and logging, ensuring observability and proactive issue resolution. • Compute: provisioning of aws resources like EC2, S3, Roles with help of terraform. • AWS-Cloud: VPC, EC2, S3, ELB System Manager, Lambda fun & CloudWatch • IaC:- Terraform • Serverless: lambda functions • Storage: EBS Storage • CI/CD tools: GitLab, Jenkins, • Orchestration: Docker & Kubernetes • Gateway: apache Api-six • Database: Postgres, MySQL • Networking: VPC, Subnet, SG/NACL, &Load Balancer
---	---

Company/Project: GlobalLogic (Hitachi-GenAI)		Duration : From Feb-2023 To Feb 2025
Team Size	5	
Technologies	AWS Cloud, Terraform, Docker/Kubernetes and CI/CD Pipeline	
Role	DevOps Engineer	
Project Overview	Worked on a Generative AI project leveraging Large Language Models (LLMs) to deliver intelligent, conversational capabilities for enterprise applications.	
Roles & Responsibilities	- Hands-on experience in AWS and Azure Cloud: AKS, ACR, Blob Storage, and Azure Key Vault. - Recourses creating with using of terraform modules AWS service management include VPC, EC2 instances, Auto Scaling groups, S3, Lambda functions, Systems Manager, AMI, snapshots, volumes, and CloudWatch. - I have used Keycloak for user management; it is an IAM service. Using Kubernetes (EKS) for the successful setup of staging, QA, UAT, and production environments for development teams. - Responsible for creating and updating resources on Kubernetes via Helm. - implemented Kubernetes orchestration/K8S to scale services dynamically and enhance application reliability using HPA, handling peak traffic without compromising performance.	

Company/Project: Paytm in Recharge workstream		Duration : From Aug-2019 To Feb 2023
Team Size	5	
Technologies	AWS Cloud, Terraform, Docker/Kubernetes and CI/CD Pipeline	
Role	SRE-DevOps Engineer	
Project Overview	Paytm is a digital wallet and e-commerce platform that offers services such as bill payments, travel, movies, and event bookings.	
Roles & Responsibilities	- provisioning of resources as per infrastructure needs and automating the configuration of resources at the time of provisioning. - AWS service management, including VPC, launching EC2 instances, auto scaling groups and their launch configuration, AMI, S3, DNS, System Manager, and CloudWatch. - Custom alerting management with different monitoring tools such as Prometheus, New Relic, and CloudWatch, and creating their custom parameters. - Taking care of audits, helping the team to fix vulnerabilities, and patching the servers as required. - Working on Apache/Tomcat web server configuration, log management, and setting up a log rotation policy as required.	

	Managing SSL renewal as required. Continuously working with development teams and providing production support as required.
--	---

Company/Project: Goibibo(MMT) Travel Domain		Duration : From Aug-2015 To Aug 2019
Team Size	7	
Technologies	Linux/AWS Cloud, CI/CD Pipeline	
Role	Linux-Admin Engineer	
Project Overview	Ibibio Group is an online travel organization founded in January 2007. The company is a subsidiary of MakeMyTrip Limited, Mauritius, which owns a 100% stake in the Ibibo Group.	
Roles & Responsibilities	- installations, configurations, and troubleshooting (L1 level) of Linux servers, Apache web server, user account management, and permission management. - Monitoring ELB, instances, and Linux servers using AWS CloudWatch. - Take care of user management, the web server log of the app, and disk management. - Performance of servers, load and threads, storage, and memory. - Managing RabbitMQ, adding consumers, and removing consumers. Live code deployment, configuration changes, and configuration provided to developers from production servers. - Cron job scheduling and troubleshooting. - Alerts clearing CPU, memory, and space from servers	

CERTIFICATIONS

☒ **Hashi Corp Certified: Terraform Associate 003**

☒ **AWS Certified Solutions Architect – Associate**

PROFESSIONAL AWARDS / ACHIEVEMENTS

- ☐ Achieved Rockstar award/Hall of Fame awarded by GlobalLogic.
-

EDUCATIONAL QUALIFICATIONS

- ☒ **MCA** from UPTU University Lucknow – 2014.
-
- ☒ **Graduation (BCA)** from CCS University, Meerut Uttar Pradesh – 2011
-
- ☒ **Intermediate** from Janta Inter College Chherat Aligarh, UP Board, Allahabad – 2008
-
- ☒ **High School** from DSSM Inter College, Kashimpur Aligarh, UP Board, Allahabad – 2006
-
